Work *Contract/Full Time*

La flife – *(2013 – Present)*
Front End Developer – Berkeley, CA

- Built front end of the website **HTML5, Javascript, Ruby on Rails**
- Helped design the front end
- Built custom HTML emails on **MailChimp/Mandrill**
- Built fully responsive website for **desktop/tablet/phone** using media queries
- Project Management with **Pivotal Tracker**

Zynga – *(2012)*
Email Marketing – San Francisco, CA

- Maintained and built email marketing campaigns for the following games:
  - FarmVille, CityVille, Hidden Chronicles, Bingo, and Slingo
- Built, designed, and tested marketing **Javascript** triggers
- Built and designed campaign micro-sites and unsubscribe pages
- **HTML5** email design
- **WordPress**

The Clorox Company - *(2012)*
Web Production - Oakland, CA

- Help fine tune the front end of Brita.com working closely with the designers
- Fixed IE Bugs and made the site cross browser compliant
- Used **jQuery** to add visual style and functionality
- Interface Design
- **WordPress**

Viscira - *(2011)*
Front End Developer – Berkeley, CA

- Maintained xCode project
- Built an iPad application using **HTML5**, **jQuery**, **Javascript**
- Worked with Sound Engineers to prepare application sound recources
- Tested and deployed application to a client
- Interface Design

YesMail/InfoUSA – *(2010)*
Web Production/Design – San Francisco, CA

- Maintained and build email marketing campaigns for the following companies:
  - Autobuytel.com, CPI Corp., Kings Hawaiian, Kodak (USA), Kodak (Canada), Macy's, VSP, Warner Brothers, YesMail Internal
- Built, designed and tested marketing JavaScript triggers
- Built and designed campaign micro sites and unsubscribe pages
- **HTML5** email Design
- **WordPress**

Work *Freelance*

ODBMS.org – *(2012)*
WordPress Designer

I built a new **HTML5 Wordpress** template for ODBMS.org from the ground up. The template is mobile compliant (**Responsive**) using **Skeleton Grid** and looks great on all screen sizes.

Perlmanrep.com – *(2006 – 2012)*
WordPress Designer

Over 6 years, I have taken PerlmanRep.com through 4 different stages of development. The site started as a simple **HTML** site and then progressed into a **PHP** powered site. PerlmanRep.com is now built on a completely custom **Wordpress** template that is mobile compliant (**Responsive**) using the **960 Grid System**. The site looks great on all screen sizes

Providence MT – *(2008)*
Joomla Development – San Francisco, CA

I built Providence MT on a completely custom **Joomla** template. The site features **HTML5** video playback and storage and has built in **Google Analytics** to track site traffic.

SpinePodium – *(2007)*
Pligg Development – San Francisco, CA

SpinePodium is an online community for spine professionals built on **Pligg** (CMS). The site features a real-time feed of spine related news and allows users to share and collaborate on spine related topics.

Non-Profits

OneSpine – (2007 – 2009)
PHP/MySQL Development – Walnut Creek, CA

Onespine.org is a website dedicated to providing spinal health in the developing world. We connect patients suffering from spinal pathology with generous people from around the world. Our network of doctors commits money towards specific spine surgeries until a funding goal is reached.
